Figure 1 consists of two cross-sectional views, (A) and (B), of a device. In both views, the device has a layered structure. Layer 10 is at the top, followed by layer 12. Below layer 12 is a wavy layer 18. Underneath layer 18 are layers 20, 22, and 24. At the bottom is layer 26. A central layer 14 is shown between layers 12 and 18. To the left of layer 14 is a hatched layer 16. To the right of layer 14 is another hatched layer 18. A circular inset in each view provides a magnified view of the interface between layer 12 and layer 14, showing a textured surface 32. In view (A), the layers are relatively flat. In view (B), the layers are deformed, and arrows indicate the movement of layer 16 relative to layer 14.
